Conclusion

# ★ Goodcabs

A cab service company dedicated to providing reliable transportation solutions.

Established Two years ago, focusing on tier-2 cities across India.

Committed to empowering local drivers to earn a sustainable living in their hometowns.

Currently operating in 10 tier-2 cities across India.

Passenger-Centric Focus: Ensuring excellent service quality to enhance passenger satisfaction.

# Objectives of the Analysis

## Primary Goal:

- Provide actionable insights to the Chief of Operations to drive growth and enhance passenger satisfaction.

## Key Focus Areas:

- Analyze trip volume to identify top and bottom-performing cities.
- Compare weekday vs. weekend demand patterns across cities.
- Evaluate passenger satisfaction through average ratings (new vs. repeat passengers).
- Analyze repeat passenger behavior, frequency, and city contributions.
- Compare actual performance metrics against monthly targets (trips, ratings, new passengers).
- Assess revenue growth rates and city-wise contributions.
- Recommend strategies for improving performance based on tourism vs. business demands.
- Explore partnership opportunities and emerging mobility trends.

# Key Steps in the Process

● Data Understanding

● Data Preparation

● Data Visualization

● Insights & Recommendations

# Data Sources and Tools

## Data Sources:

- There are **2 databases** and **8 tables**
- **trips\_db** : This database contains both detailed and aggregated data on trips, passenger types, repeat trip, and day type
- **targets\_db** : This database holds Goodcabs' monthly targets for each city, including goals for trip counts, new passenger acquisition, and average passenger ratings.

## Tools Used:

- **Power BI** : To design interactive dashboards and perform data visualization.
- **SQL** : For data extraction, transformation, and ad-hoc queries.
- **Power Query** : To clean and transform data for analysis.
- **Canva** : To create visually appealing presentation slides.

# Revenue Analysis

## City with High Revenue

## City with Lowest Revenue

## Top Months By Revenue

### Avg Fare Per Trip :

**Jaipur** has the highest (Rs.483.92) average fare per trip while **Surat** has lowest (Rs.117.27)

### Avg Trip Distance :

**Jaipur** has the longest(30 km) average trip distance while **Surat** has shortest(11 km)

Revenue generated on **Weekday** is **56%** while on **Weekend** it is **44%**.

### Revenue By Month :

**June** month generated the least revenue (Rs.15.4M) while February has generated most revenue(Rs. 19.9M)

# Repeat Passenger Analysis

## City with High RPR

- 1 Surat
- 2 Lucknow
- 3 Indore

## City with Low RPR

- 1 Mysore
- 2 Jaipur
- 3 Chandigarh

## Months with High RPR

- 1 May
- 2 June
- 3 April

### Repeat Passenger Frequency:

Vishakhapatnam, Jaipur & Mysore has highest repeat passengers for 2-Trips & 3-Trips.

### Repeat Passenger Frequency:

Vadodara, Surat, Mysore, Coimbatore has significant count for 4-Trips, 5-Trips, 6-Trips.

### Factors Influencing RPR:

- **Average Fare Per Trip:** Competitive and affordable fares encourage repeat usage.
- **Passenger Ratings:** Higher satisfaction levels, reflected in positive ratings, drive repeat customers.

## Avg Passenger Rating Vs Target Avg Passenger Rating

## New Passengers Vs Monthly Target New Passengers

## Actual Trips Vs Monthly Target Trips

# Performance Against Targets

**Jaipur** leads with **13.91%** in trip targets, indicating strong performance.

**Luknow** and **Vadodara** lag behind the trip target with deficits of **10.70%** and **14.60%**

**Surat** and **Lucknow** have **more new passengers** than target, but passenger **rating** is **low**. Needs improvement in service quality

**Mysore, Jaipur & Kochi** has **high passenger rating**. But need to **focus** on marketing strategies and new campaigns to attract **new passengers**

**February, May, March** has chased the Trip Target while **June** lag behind trip target by **11.34%**

**April** is the only to cross new passenger target while **March** lag behind with lowest by **16.04%**

# Strategic Recommendations

## Dynamic Pricing

Adjust fares during peak demand hours and local events to maximize earnings

## Driver Training

Regular sessions to boost service quality and operational safety

## Tech Upgrades

Launch features like fare splitting, pre-scheduling, and real-time tracking

## Subscription Plans

Introduce loyalty memberships with exclusive offers for repeat passengers

## Incentives for Excellence

Bonuses for drivers with top ratings and low cancellation rates

## Eco-Friendly Fleet

Transition to electric vehicles for sustainable growth

## Corporate Partnerships

Collaborate with businesses for employee transport or bulk bookings

## Route Optimization

Use data analytics to minimize idle time and fuel usage

## Localized Marketing

Run campaigns tailored to city-specific needs and events

# Conclusion

Goodcabs has made significant strides in tier-2 cities.

Analysis reveals opportunities to enhance performance and passenger satisfaction.

Implementing recommendations will position Goodcabs for sustained growth in 2024.
